	Adjusting the Powder Feeder	Page : 1 of 3	Revision : 00 Date : 10/06/2010
	Author: Patrick Owen	Job Specific	

Personnel responsible:

1. Lead Operator / Supervisor

Safety:

Safety shoes, safety glasses, and hair net are required when working at Repack.

Summary:

When running products that require powder additives, the feeder needs to be set for the product. A label is on the feeder control to assist with the set up.

Procedure:

1. If the product is requires Aspartates, adjust the feeder to “800”.
2. If the product requires Baking Soda, adjust the feeder to “500”.
3. All adjustments are made by pushing the “+” or “-“ to rotate the readout dial.
4. Verify the correct setting before beginning production of a product requiring additives.
