Personnel responsible:

All Production

Safety equipment:

Personal Protective Equipment (PPE): Acid Suits, Acid Boots, Acid Gloves, Face Shields, and Safety Glasses

Summary:

To ensure all Acid Personal Personal Equipment is properly stored and maintained.

Procedure:

- 1) Any employee dealing with Acid must have appropriate Acid Gear.
- 2) Acid Suits will be supplied to Material Handlers, Assistant Operators, Lead Operators, Maintenance, Warehouse Loaders, and Production Management.
- 3) Acid Gear consists of Acid Suit, Acid Boots, Acid Gloves, Face Shield, and Safety Glasses
- 4) Personal Protective Equipment (PPE) is the responsibility of the employee therefore; any employee with Acid Gear must put their initials with black marker on the suit, gloves, boots, face shield, and glasses.
- 5) Material Handlers, Lead Operators, Assistant Operators, Warehouse Loaders, Production Management, and Maintenance will be supplied lockers to store Acid Gear.
- 6) Acid Gear must be stored properly in locker. Storing PPE properly allows employees to safely and quickly access equipment if needed.
- 7) Acid Suits must be hung up in locker. Acid Gloves must be stored on shelf or hung up in locker. Acid Boots must sit upright together at the back of locker. Face shields must be stored on shelf in plastic cover. Safety glasses should be worn at all times in production areas. (Please See Pictures of Proper Storage Below).

**PPE – Jackets and Pants
are always Hung neatly on
hangers**

**Shields neatly hung
All tools hung neatly**

- 8) Acid Gear is **“NOT”** to be left anywhere in the production areas. If you are not using your gear it **“MUST”** be stored in locker properly. If employee does not store Acid Gear properly or leaves any part of gear lying around the production areas they will face disciplinary action.
- 9) Employee is **“REQUIRED”** to inspect their acid gear every Monday of their day shift. Employee will inspect suit, gloves, and boots for holes and tears. Employee will inspect face shield for cracks and scratches. Production Management and Warehouse Loaders are **“REQUIRED”** to check acid gear once a month due to the limited usage of gear. If the acid gear is used then Warehouse Loaders and Production Management are **“REQUIRED”** to check after usage.
- 10) Employee must fill out log sheet for Acid Gear Inspection. Log Sheets must be turned into Safety Manager. If there are any problems with Acid Gear it **“MUST”** be reported to Safety Department immediately. This allows employee to get new equipment if needed.
- 11) Safety Department will be responsible for ordering all acid gear. Safety Department will keep one spare acid suit and boots in every size in inventory. Safety Department will keep gloves and face shields in inventory.
