
	GILES CHEMICAL ~ PREMIER MAGNESIA		
	Company Procedure		
	Title: LOTO Bag Taper #1	Number: S12-PR-200-069	
	Owner: Robert Willis	Revision: 01	
	Effective Date: 05/28/13	Page: 1 of 2	

1.0 Purpose

The purpose of this procedure is to define the process required to lock out the Box Taper #1 in repack.

2.0 Scope

This applies to bag taper #1 that needs to be shut down temporarily for minor repair.

3.0 Responsibility

Manufacturing and production

4.0 Safety Considerations

Safety glasses and appropriate safety apparel is to be worn at all times.

Safety is a condition of employment. Employees are not authorized to work in an unsafe manner and are prohibited from harming the environment of the facility or community.

5.0 Materials/Equipment

- Lock
- Tag
- Lock out device

6.0 Procedure

The proper process to lockout Box Taper #1 is as follows:

1. Notify all affected employees that the machine is being taken out of production.
2. Make sure machine is in the off position
3. Unplug cord and install cord end locking device
4. Install padlock-multi locking device
5. ID tag with name, date and time
6. Test to see if Box Taper #1 is operational

Proper procedure to return equipment to operation:

1. Make sure all work is complete and all tools and maintenance equipment has been removed from the machine.

Controlled Document

Only those quality documents viewed through the Giles Chemical electronic Documentation System are officially controlled. All other copies, whether viewed through another computer program or a printed version, are not controlled and, therefore, the Quality Unit at Giles assumes no responsibility for the accuracy of the document.
