
	GILES CHEMICAL ~ PREMIER MAGNESIA		
	Company Procedure		
	Title: Fire Prevention Quiz	Number: S13-PL-200-F003a	
	Owner: Bryan Butler	Revision: 0	
	Effective Date: 8/8/13	Page: 1 of 1	

Employee: _____ Date: _____ Trainer: _____

- 1) **True / False** Fire requires four elements in order to occur: heat, oxygen, fuel, and chemical reaction.
- 2) **True / False** Identifying the existing hazards and taking actions to resolve them are the two major steps in determining fire hazards.
- 3) **True / False** It is ok to store piles of combustible materials next to one another.
- 4) **True / False** Bulk quantities of flammable liquids should be stored outdoors and away from buildings.
- 5) **True / False** It is ok to use extension cords to connect heating devices to electrical outlets.
- 6) **True / False** Proper housekeeping has no effect on fire prevention.
- 7) **True / False** Fire extinguishers are checked monthly by the Safety Department.
- 8) **True / False** Examples of fuel could be in the form of solid, liquid, or gas.
- 9) **True / False** It is ok to use pressurized gas cylinders without pressure regulators.
- 10) **True / False** All materials should be stored away from potential ignition.

Controlled Document

Only those quality documents viewed through the Giles Chemical electronic Documentation System are officially controlled. All other copies, whether viewed through another computer program or a printed version, are not controlled and, therefore, the Quality Unit at Giles assumes no responsibility for the accuracy of the document.
