Page: **1 of 1**

In-Depth Security Training

Training that provides a detailed understanding of a company's security plan including company security objectives, specific security procedures, employee responsibilities, actions to take in the event of a security breach and the organizational security structure. This training must be provided to hazmat employees who handle or perform regulated functions related to the transportation of the materials covered by the security plan or who are responsible for implementing the security plan.

Since Giles is classified as Class 8 Group 2, an In-Depth Security Plan is not required. However, the company Security Plan is included as part of this module's training.

Procedure:

Security Plan - S14-PG-200-007

Controlled Document

Only those quality documents viewed through the Giles Chemical electronic Documentation System are officially controlled. All other copies, whether viewed through another computer program or a printed version, are not controlled and, therefore, the Quality Unit at Giles assumes no responsibility for accuracy of the document.
