	Owner: Patrick Owen	Revision: 0	
	Effective Date: May 20, 2014	Page: 1 of 17	

#### Approvals

Signing below indicates agreement that the execution of the Installation, Operational, and Performance Qualification Protocol for Auto Pouch #3, Weighpack Swifty Bagger 1200, located at 396 Smathers Street at the Repackaging facility is complete and the process is validated.

Project Team Member	Functional Area	Signature	Date
Patrick Owen	Engineering		5/20/14
Sammy Henson	Maintenance		5/20/14
Monte Plott	Production		5/20/14
Matt Haynes	Operations		5/20/14
Deborah Durbin	Quality		5/20/14

A copy of the executed protocol will be attached behind this report.

#### Controlled Document

Only those quality documents viewed through the Giles Chemical electronic Documentation System are officially controlled. All other copies, whether viewed through another computer program or a printed version, are not controlled and, therefore, the Quality Unit at Giles assumes no responsibility for accuracy of the document.

	Title: Auto Pouch 3 IQ/OQ/PQ Final Report	Number: E14-VAL-RFR-710	
	Owner: Patrick Owen	Revision: 0	
	Effective Date: May 20, 2014	Page: 3 of 17	

## I. PURPOSE:

The purpose of the protocol is to certify with documented evidence that the Auto Pouch 3 (WeighPack Swifty Bagger 1200, Serial #4033), functions as intended throughout its anticipated operating ranges. This final report provides documented evidence that the objectives, methodology, documentation, and test activities needed to complete the Installation Qualification (IQ), Operational Qualification (OQ) and Process Qualification (PQ) for the Auto Pouch 3 located at Giles Chemical Repackaging Unit, 396 Smathers Street, Waynesville, NC were all executed and all acceptance criteria were met.

## II. SUMMARY

This Auto Pouch 3 (WeighPack Swifty Bagger 1200) was manufactured by WeighPack, Inc and purchased new from WeighPack. It was installed at Giles in May of 2014. The machine is used to fill and seal pre-made plastic pouches, typically in 3 pound size.

The products that are impacted by this study were all Epsom Salt products manufactured by Giles Chemical. No other departments or systems were be affected by the installation or use of this equipment.

The following tests were performed in this qualification:

Controls/Indicators Verification – to verify and document that the start/stop, emergency stop, and feed controls operate properly.

Lot code and expiration date verification: Verification of proper imprinting of the lot code and expiration date.

Sealed pouch: Verification that the Auto Pouch 3 securely seals the pouch.

Fill Weights: Verification that Auto Pouch 3 is capable of producing a finished product that contains a weight of Epsom Salt with a minnum of the label stated weight.

All Installation, Operational, and Performance acceptance criteria were met as displayed in the tables in the Appendices.

## III. CONCLUSION

The results of the completed Installation Operational Performance Qualification protocol show that all acceptance criteria were met for all samples. All testing results provide documented evidence Auto Pouch 3 (WeighPack Swifty Bagger 1200 Serial #4033) is installed, operating, and performing as expected. Auto Pouch 3 (WeighPack Swifty Bagger 1200 Serial #4033) is considered validated.

## IV. RECOMMENDATIONS

1. It is recommended that Auto Pouch 3 (WeighPack Swifty Bagger 1200 Serial #4033), located at Giles Chemical Repackaging, 396 Smathers Street, Waynesville, NC 28786 be considered validated based on meeting the acceptance criteria of the IQ/OQ/PQ protocol.

## Appendix I: INSTALLATION QUALIFICATION

### A. Installation Qualification

#### 01. Location

- a. Verify that Auto Pouch #3 is positioned properly

Distance Criterion	Is the current area sufficient to open the access without obstructions (Yes/No)
Allow sufficient room around the machine for access doors and panels to be opened	YES
The machine must be located in an area that is adequately ventilated	YES

#### 02. Level

- a. It is important to make sure that the Auto Pouch #3 is level.

Is the unit level? (Yes/No)	Acceptable (Yes/No)
YES	YES

#### 03. Utilities

- a. Verify that unit is receiving its specified utility requirements.

Specified	Actual
220-240V for Machine	234
220-240V for Scale	234
60 Hz	60
A compressed air line should be in place	Yes

Controlled Document

## Appendix II: OPERATIONAL QUALIFICATION

1. Controls/Indicators Verification – to document that the Auto Pouch #3 operates as described.

Description	Function	Did Item function properly (Yes/No)
Controls On/Off	With line power to the machine turned on, the controls switch powers up the control panel	YES
Infeed	The infeed button on the control screen starts the process of feeding pouches onto the carousel	YES
Emergency Stop	The emergency stop button stops the motion of the machine when pressed. It must be reset before the machine can be started again.	YES
Date Coder	Verify that the date coder stamps a date code on the pouch as it indexes to the date code station.	YES
Dump Scale	Verify that when a pouch is presented by the carousel to the fill station that the filler dumps a charge into the properly presented pouch.	YES
Sealer	Verify that the sealing station seals the filled pouch when it indexes into the seal station	YES

Controlled Document

Only those quality documents viewed through the Giles Chemical electronic Documentation System are officially controlled. All other copies, whether viewed through another computer program or a printed version, are not controlled and, therefore, the Quality Unit at Giles assumes no responsibility for accuracy of the document.

## GILES CHEMICAL ~ PREMIER MAGNESIA

### Validation Protocol

Title: Auto Pouch 3 IQ/OQ/PQ Protocol	Number: E14-VAL-RIQ-701
Owner: Patrick Owen	Revision: 0
Effective Date: April 22, 2014	Page: 3 of 15

#### I. PURPOSE:

The purpose of this protocol is to certify with documented evidence that the Auto Pouch #3 (WeighPack Swifty Bagger 1200), functions as intended throughout its anticipated operating ranges. This protocol sets forth the objectives, methodology, documentation, and test activities needed to complete the Installation Qualification (IQ), Operational Qualification (OQ) and Process Qualification (PQ) for the Auto Pouch #1 located at Giles Chemical Repackaging Unit, 396 Smathers Street, Waynesville, NC.

#### II. BACKGROUND:

This Epsom Salt Auto Pouch #3 was manufactured by WeighPack in Toronto, Canada. The machine was purchased by Giles in March of 2014. The installation is expected by May 1, 2014. The machine is used to fill and seal pre-made plastic pouches, typically in 3 and 6 pound sizes.

The products that are impacted by this study are all Epsom Salt products manufactured by Giles Chemical.

#### III. OVERVIEW

No other departments or systems will be affected by the installation or use of this equipment.

The following tests will be performed in this qualification:

Controls/Indicators Verification – to document that the start/stop, emergency stop, and feed controls work properly.

Lot code and expiration date verification: Verification of proper imprinting of the lot code and expiration date.

Sealed pouch: Verification that the Epsom Auto Pouch #3 securely seals the pouch.

Fill Weights: Verify that Auto Pouch #3 is capable of producing a finished product that contains a weight of Epsom Salt with a minimum of the label stated weight.

#### IV. SYSTEM DESCRIPTION:

A. Auto Pouch #3 will open, fill, and top seal plastic pouches with Epsom Salt. It is a 1 line system, opening filling, and sealing 1 pouch at a time.

B. Description of Operation

01. The empty pouches are fed into the machine by a vacuum cup system. The feeder system presents the pouches to a set of gripper arms. The grippers move the pouch in a linear fashion through each station, opening, filling, sealing, and discharge. The motion is intermittent.
02. The pouch is fed to the gripper arms, then moves to a date stamp station where the date code is applied. Then the pouch moves to a pre filling station. There, mechanical flaps open the pouch for filling. The next station is the pouch detect, air blow station. A vacuum sensor detects if suction cups are successful in opening the pouch, and air is injected into the open pouch in anticipation of filling. The next station is for filling. A 4 head scale dumps a pre-measured dose of salt into the pouch.
03. The filled pouch then indexes to a settling station and a mechanical settler gently taps the bottom of the filled pouch to settle the contents. The pouch then indexes to the sealing station, where to top of the pouch is sealed. Finally the pouch indexes to the drop station where the gripper arms release it onto a discharge conveyor.
04. From the discharge conveyor, the pouches are dropped onto a packing conveyor. Finally, the pouches are then manually packed into case packaging.

#### V. SCOPE

The Installation Operational Performance Qualification protocol is intended to certify with documented evidence that Auto Pouch #3 is installed, operates, and functions as intended throughout its anticipated operating ranges.

#### VI. ROLES AND RESPONSIBILITIES

1. Engineering

### Controlled Document

- ❖ Write and issue the protocol
  - ❖ Investigate protocol deviation reports
  - ❖ Execute the OQ and manage the data collection for the PQ.
  - ❖ Review raw data and originate interim notification to Quality Assurance
  - ❖ Write and route the final report
2. Quality Assurance
- ❖ Review and approve the protocol.
  - ❖ Review and approve raw data and notifications.
  - ❖ Review, approve, and store the final report.
3. Maintenance
- ❖ Provide Equipment Manuals needed to execute operational qualification.
  - ❖ Review and approve the protocol.
  - ❖ Execute the IQ.
  - ❖ Review and approve raw data and notifications.
  - ❖ Review and approve the final report
4. Production
- ❖ Execute the PQ.
  - ❖ Review and approve the final report.

## VII. TEST PROGRAM

### A. INSTALLATION QUALIFICATION

#### Objective

The objective of the installation verification is to document that Auto Pouch #3 is installed as indicated by WeighPack.

#### Equipment/Materials

Auto Pouch #3, WeighPack Swifty Bagger 1200

Ideal Digital Multimeter Model #61-340 (SN 100100221)

#### Procedure

Perform each listed below for Auto Pouch #3.

- Location: Verify that the equipment is situated to allow sufficient room around the machine for access doors and panels to be opened.
- Level: Verify instrument is level.
- Utilities
  - Electrical Requirements: Verify that instrument is receiving its specified Voltage.

#### Acceptance Criteria

Ensure that the installation is in accordance with the manual's specifications.

### Controlled Document

## B. OPERATION QUALIFICATION

### Objective

The objective of Controls/Indicators Verification is to document that Auto Pouches #3 operates as indicated by WeighPack. The controls will be operated to test the ability of Auto Pouches #3 to provide adequate control for starting/stopping, pouch feed, and emergency stop.

### Equipment/Materials

Auto Pouches #3, WeighPack Swifty Bagger 1200

### Procedure

Test each operation of Auto Pouches #3

### Acceptance Criteria

Verification that start/stop, infeed, and emergency stop controls function as indicated by operation manual

## C. PERFORMANCE QUALIFICATION

### Objective

The objective of performance testing is to document that Auto Pouches #3 performs the function required by Giles Chemical. The final product will be tested to verify:

- That Auto Pouches #3 firmly seals pouch.
- That the lot code and expiration date numbers are printed properly and accurately.
- That the fill weights are within the accepted range (3.0+ pounds for 3 pound pouches ).

### Equipment/Materials

Auto Pouches #3, WeighPack Swifty Bagger 1200

Empty Pouch(es) (for tare)

Scale

### Procedure

Run Auto Pouches #3 on 3 pound pouches for 4 hours while randomly sampling 25 pouches per hour for testing, for a total sample size of 100 pouches.

Examine the finished product and check for:

- That Auto Pouches #3 firmly seals the carton on both ends.
- That the lot code and expiration date numbers are imprinted properly and accurately.
- That the fill weights are within the accepted range.

### Acceptance Criteria

Auto Pouches #3 firmly seals the pouch.

Auto Pouches #3 correctly imprints the lot code and expiration date.

That the fill weights are within the accepted range of 3.00+ pounds for 3 pound pouches.

**ATTACHMENT II.     PROTOCOL DEVIATION REPORT (PDR)**

\_\_\_\_\_ General Information \_\_\_\_\_

System Name: \_\_\_\_\_ Protocol Number: \_\_\_\_\_

Deviation Report Number: \_\_\_\_\_ Protocol Step & Page No.: \_\_\_\_\_ -

\_\_\_\_\_ Instructions \_\_\_\_\_

1. The validation specialist assigns a sequential report number for each deviation with a specific protocol. For example, 001, 002, etc. can be easily referenced in a report.
2. Reference the relevant protocol number, step and page number of the noted deviation above.
3. Complete the below listed sections. If necessary, use additional pages and attach any supporting info.
4. Include the original PDR(s) with the protocol as an attachment. Summarize the impact of the deviation in the Validation Report.

\_\_\_\_\_  
Description of Deviation:

Investigation Evaluation and Results:

Corrective Action and Resolution:

\_\_\_\_\_  
Overall Investigation Review:

Prepared By: \_\_\_\_\_ Date: \_\_\_\_\_
