

GILES CHEMICAL CORPORATION		
COMPANY PROCEDURE		
Standard Operating Procedure	Page : 1 of 2	Revision : Date : 02/12/07
Author: Maintenance	Title: Lock Out Tag Out Conveyor #1	

**Safety:** *All safety glasses and appropriate safety apparel is to be worn at all times.*

**Purpose or Objective:** *The purpose of this procedure is to define the process required to lock out the Conveyor #1 in the Repack facility*

**Procedure:** *The proper process to lockout the Conveyor #1 is as follows:*

- 1. Notify all affected employees that the machine is being taken out of production.*
- 2. Turn electrical disconnect off and install pad lock-multi locking device with id tag*
- 3. ID tag must contain name, date and time lock out occurs.*
- 4. Test the machine to ensure that it is locked out and will not start.*

*Proper procedure to return equipment to operation:*

- 1. Make sure all work is complete and all tools and maintenance equipment has been removed from the machine.*
- 2. Notify all affected employees that equipment is about to be put back into service.*
- 3. Remove ID tag with name, date, and time.*
- 4. Remove multi-locking device with padlock*
- 5. Return disconnect to the on position*
- 6. Check to ensure Conveyor #1 is operating properly.*
