
	GILES CHEMICAL ~ PREMIER MAGNESIA		
	Company Procedure		
	Title: LOTO #3 Elbow Pump	Number: S12-PR-200-030	
	Owner: Robert Willis	Revision: 02	
	Effective Date: 05/21/13	Page: 1 of 2	

1.0 Purpose

The purpose of this procedure is to define the process required to lock out the Elbow Pump at the Manufacturing facility.

2.0 Scope

This procedure applies to all maintenance workers.

3.0 Responsibility

Maintenance and Production

4.0 Safety Considerations

Safety glasses and appropriate safety apparel is to be worn at all times.

Safety is a condition of employment. Employees are not authorized to work in an unsafe manner and are prohibited from harming the environment of the facility or community.

5.0 Materials/Equipment

- Lock
- Tag
- Lock out device

6.0 Procedure

The proper process to lockout Elbow Pump #3 is as follows:

1. Notify all affected employees that the machine is being taken out of production.
2. Locate disconnect for Elbow Pump #3
3. Turn disconnect for Elbow Pump #3 to the off position
4. Install multi-locking device on the disconnect
5. ID tag with name, date and time
6. Test start switch to ensure equipment is not operational

Proper procedure to return equipment to operation:

1. Make sure all work is complete and all tools and maintenance equipment has been removed from the machine.
2. Notify all affected employees that equipment is about to be put back into service.

Controlled Document

Only those quality documents viewed through the Giles Chemical electronic Documentation System are officially controlled.
