<div align="center">Pouch and Carton Quality Checklist</div>

1. Seals
   - Pouches and Cartons----Make sure the seal is even across the pouch and it covers enough area to produce a tight seal. Make sure there are not any air bubbles in the seal.

2. Date Code
   - Pouches----Make sure the date code is completely legible. It should not be over any type of print
   - Cartons-----Make sure the code is printed on the top of the carton.

3. Cases
   - Make sure the date is legible on all of the case boxes. Also, there should not be any damage on the outside of the corrugated boxes.
